

## Payment Mining - a completely new paradigm of payment

Many blockchain projects have presented a vision of pioneering the payment market through cryptocurrency payments. Cryptocurrency, however, is still difficult to use as a payment method because price volatility is high and affiliates and users are not motivated to participate.

TENA is a payment protocol that pays in fiat currency are compensated with TENA coins. Payment mining expands people's use of payment as well as facilitating payment behavior. As the number of payment participants increases, TENA prices also become more stable, proving their value as money.

Register my credit card with the GOPAY app

Barcode payment

TENA compensated to the customer

\*GOPAY is TENA Protocol's first DAPP.
